

# OCEAN CHECK-IN KIOSK

With the Ocean Kiosk, patients can swipe their health card at a kiosk stand in order to check in, review and update their demographics, complete forms and even change their status to “arrived” in the EMR.

## Why Should You Use an Ocean Kiosk?

The Ocean Kiosk can streamline check-in, reduce the burden on front-desk staff, and make it easy to ensure patient data is kept up-to-date and accurate. With the easy-to-use healthcard swipe, patients can automatically load any administrative forms, email consent, clinic reminders and more.

## Ocean Kiosk Stands

CognisantMD is proud to offer our clients a selection of three kiosk models that are manufactured in Canada and designed for commercial use. Our interactive tablet kiosk stands feature a fully-enclosed locked tablet housing and integrated cable routing, offering a secure, elegant addition to your waiting room. The kiosks also integrate directly with a healthcard swipe reader to allow easy check-in with automated healthcard expiry check.

**Countertop Kiosk:** The countertop model can be placed on a table or reception desk and can be easily moved to accommodate different locations. This model incorporates a built-in 90° range of movement for improved accessibility.

**Wall-mounted Kiosk:** The Wall-Mounted Kiosk offers flexibility when floor space is limited. This model incorporates a built-in 90° range of movement for improved accessibility.

**Floor Kiosk:** Our traditional Floor Stand Kiosk is designed with a solid, weighted base and optional floor mounting holes to prevent tipping.

Ocean users can order the Ocean Kiosk Stand directly from CognisantMD by visiting [cognisantmd.com/kiosk](http://cognisantmd.com/kiosk).
